## CXP-C4440

### CMOS 20 MP

Dual CXP-6

### Imperx: C4440

The CXP-C4440 camera features the Sony Pregius IMX367 Global Shutter CMOS sensor with a native resolution of 4416 x 4436 in a 4/3" optical format delivering up to 39.6 frames per second with a dual CXP-6 CoaXPress output. CMOS technology eliminates smear columns from areas of ultra-bright intensity and specular reflections in uncontrolled lighting applications. The Imperx Cheetah line provides excellent image quality with Imperx proprietary processing. In addition, Imperx puts you in control and gives you full access to raw data without corrections. Using the simple, intuitive GenICam™ compliant user interface, you can quickly apply image corrections, if desired. The CXP-C4440's flexibility, image quality, and speed make it suitable for a broad range of diverse and demanding applications, but "one size doesn't fit all," and Imperx can help optimize the camera to your exact requirements.
