

Press Release

ON Semi Announces the Production Discontinuation of CCD Image Sensors

ON Semiconductor

Last time buy for Imperx Bobcat and Tiger CCD camera lines is February 15, 2020.

ON Semiconductor has announced the EOL (end of life) for all CCD image sensors currently in production.

In its public notification, ON Semiconductor says: "The ongoing market conversion from CCD to CMOS image sensors has been accelerated both by an industry slowdown that began in 2018 as well as availability of advanced CMOS image sensors such as ON Semiconductor's line of XGS products. In light of these factors, ON Semiconductor has been monitoring the sales activity and viability of our CCD image sensor products. As a result of this analysis we regret to announce discontinuance of our CCD products as described."

All CCD Sensors (KAI, KAF, KAE, KLI, KAC) by ON Semiconductor are impacted by this end-of-life. The former Kodak CCD facility in Rochester US, will then cease operations in June 2020.

A list of affected Imperx, Inc. cameras can be found [here](#).

The Imperx, Inc. sensor experts are available to advise and support for any questions regarding last orders, replacement options and any sensor evaluations. The team will assist to secure existing projects before the Last Time Buy expires. For CCD offers, orders and individual solutions, please contact Imperx, Inc.

For further details see the [official announcement from ON Semiconductor](#).

About Imperx, Inc.

Imperx, Inc. is a leading global designer and manufacturer of superior quality digital imaging products and software. Imperx products serve in aerospace and defense, machine vision, transportation and engineered systems, automation, plus many more industries.
