INTELLIGENT CAMERA SERIES

ICL-B1610

IMPERX ICL-B1610 is an advanced progressive scan, fully programmable CCD camera designed for imaging applications that require high quality images, powerful features and flexibility. The camera is small, light weight, and built around SONY's ICX-274 4.4 micron interline transfer CCD image sensor with a 1.1/8" optical format.

IMPERX ICL-B1610 provides an image resolution of 1628 x 1236 and delivers up to 25 frames per second at full resolution. The camera's 14 bit internal data image processing engine is based on an industrial grade high-speed, high-density FPGA, enabling a broad standard feature set and easy implementation of demanding custom imaging solutions. The thermally optimized, mechanical and electrical design plus the extended operating temperature range (-40°C to +85°C), and high MTBF of 660,000 hours @ 40C, make this Camera Link® camera a perfect fit for the most demanding industrial, medical, scientific and military applications. This camera is also available with CoaXPress or GigE Vision® interfaces.
