

Imperx Workmanship Standard Policy

Imperx, Inc. complies with the workmanship standards of:

IPC 610 *Acceptability of Electronic Assemblies*

IPC 620 *Requirements and Acceptance of Cable and Wire Harness Assemblies*

Description

IPC, the Association Connecting Electronics Industries, is a trade association whose aim is to standardize the assembly and production requirements of electronic equipment and assemblies. It was founded in 1957 as the Institute for Printed Circuits. Its name was later changed to the Institute for Interconnecting and Packaging Electronic Circuits to highlight the expansion from bare boards to packaging and electronic assemblies. In 1999, the organization formally changed its name to IPC with the accompanying tagline, Association Connecting Electronics Industries.

IPC is accredited by the American National Standards Institute (ANSI) as a standards-developing organization and is known globally for its standards. It publishes the most widely used acceptability standards in the electronics industry.
